Exchange Semester in Market Finance
Relevant coursework: *Trading, Futures & Options, Portfolio Management ($1M student fund)*

2023 – 2027 **École supérieure d'ingénieurs Léonard-de-Vinci (ESILV)** Paris, France
Master in Financial Engineering
Relevant coursework: *Derivatives Pricing & Hedging, Equity Derivatives, Market Risk, Simulation Methods*

2021 – 2023 **Lycée Fénelon Sainte Marie, Paris 8e (75)** Paris, France
Preparatory class for top French engineering schools: MPSI-MP

2020 – 2021 **Lycée Sainte Croix de Neuilly, Neuilly-sur-Seine (92)** Paris, France
Baccalauréat with concentration in Mathematics, Physics and Chemistry, Graduated with Honours

WORK EXPERIENCE

Mar. 26 – Aug. 26 (6 months) **Gap Year Internship – Market Risk Management – Fixed Income** Paris, France
CIC Corporate & Institutional Banking
- Produced daily P&L explain (curve, spread, carry) for the Fixed Income desk
- Monitored BPV, CS01 and convexity vs. desk limits; escalated breaches and anomalies to traders
- Tracked sovereign, OIS and swap curves and credit spreads to explain daily risk and P&L moves
- Automated daily risk reporting in Excel/VBA, cutting production time

Sep. 25 – Feb. 26 (6 months) **Gap Year Internship – Assistant Portfolio Manager (Diversified Mandates)** Paris, France
OFI Invest Asset Management
- Built a Credit VaR model on securitization exposures (Merton and Vasicek models)
- Designed a quantitative scoring framework to screen private market fund managers
- Conducted due diligence on private debt funds and drafted investment committee memos
- Automated portfolio monitoring and performance reporting in VBA across mandates

Apr. 25 – Aug. 25 (5 months) **Internship – Market Risk Management – Volatility & Hybrids** Paris, France
CIC Corporate & Institutional Banking
- Produced daily and monthly P&L for the Convertible Bonds desk, including NBI reconciliation (IFRS vs economic)
- Analyzed CB desk results and risk drivers (delta, vega, credit sensitivity)
- Priced equity and index options and monitored dividend assumptions for volatility products
- Rebuilt 20+ Excel/VBA P&L and risk reports, cutting production time by up to 90%

PROJECTS

Sep. 24 – Apr. 25 **Banking Stress Testing Tool (Python)**
- Researched stress testing methodologies used in the banking sector (regulatory vs internal, historical vs hypothetical scenarios)
- Built a Python application to compute and visualize stress test impacts on a bank's ALM portfolio

Sep. 24 – Jan. 25 **Option Pricer (C++)**
- Developed a C++ pricer for European and American options using Black-Scholes and the CRR binomial tree, with delta computation
- Implemented Monte Carlo simulation to price options and benchmark results against closed-form and tree prices

LANGUAGES & IT SKILLS

Languages French (native), English (fluent), Spanish (conversational)

IT skills Python, VBA, Excel, C++, SQL, R, Bloomberg Terminal, thinkorswim

Certifications Bloomberg Market Concepts (BMC), Bloomberg Spreadsheet Analysis (BSA)

ACTIVITIES & INTERESTS

Sport Tennis (French ranking 30/3, 12 years), Football (10 years)

Non-profit Scouting (5 years) ; Volunteer at UCPH (night street patrols for the homeless)
